

# Abdulla Raiyyan

8247820120 | f20241312@pilani.bits-pilani.ac.in | github.com/7se7en72025

## EDUCATION

**Birla Institute of Technology and Science, Pilani (BITS Pilani)**

*B.E. in Civil Engineering*

India

2024 – 2028

## EXPERIENCE

**Nudron IoT Solutions**

Feb 2026 – May 2026

*Flutter Developer*

- Developed and maintained cross-platform Flutter apps for real-time IoT device monitoring and control, integrating with backend APIs for live telemetry.
- Designed reusable UI components and state-management logic, improving app responsiveness and collaborating with hardware engineers on device connectivity.

**Independent Open Source Contributor**

2024 – Present

*Software Developer*

- Maintained NYXA-UI (49+ GitHub stars) and sent pull requests to Kyverno, Litmus, and Sugar Labs' Music Blocks and Speak-AI.
- Logged 350+ GitHub contributions in the past year across commits, pull requests, and code reviews.

## PROJECTS & OPEN SOURCE CONTRIBUTIONS

**NYXA-UI** | *JavaScript*

- Built a JavaScript UI project from zero to 49+ GitHub stars, architected around a modular, component-driven design.
- Owned the full lifecycle solo — design, build, release, and iteration — shipping features directly off community feedback.
- Open-sourced under MIT and kept it actively maintained, turning a side project into one of the top-performing repos on the profile.

**Speak-AI** (Sugar Labs) | *Python*

- Rebuilt Sugar Labs' Speak activity into an AI-native tool by fusing a small language model (SLM) with an LLM for fast, high-quality responses.
- Integrated Kokoro-based voice synthesis to add richer, more natural voice variety on top of the original text-to-speech engine.
- Shipped a working SLM+LLM pipeline as a real feature in an active open-source education project used by children worldwide.

## POSITION OF RESPONSIBILITY

**UI/UX Lead, Product Design Club**

Aug 2025 – Feb 2026

- Led a team of 12 designers on internal apps and club projects; ran design workshops teaching 50+ students Figma and UI/UX fundamentals.
- Built and maintained a shared design system with reusable component libraries, cutting prototyping time by 40%.

**Technical Lead, Andhra Samithi**

Apr 2026 – Present

- Mentored junior developers within the club, conducting practical sessions on basic web development, hosting, and Git version control.
- Built and launched the official club website from scratch, developing custom sections for club history, executive board listings, contact portals, and archives of past achievements.

## EXTRA CURRICULAR ACTIVITIES

**UI/UX Designer – Department of Visual Media**

Mar 2025 – Present

- Co-designed for Oasis and Apogee, directing the end-to-end product design lifecycle for flagship festival web and mobile platforms supporting a footfall of 6,000+ attendees.
- Architected high-fidelity interfaces, scalable design systems, and cross-platform user journeys, collaborating with developer teams to ensure pixel-perfect delivery for high-traffic digital infrastructure.

## TECHNICAL SKILLS

**Languages:** Go, Python, JavaScript, TypeScript, Dart, Kotlin

**CS Fundamentals:** Data Structures & Algorithms, OOP, Operating Systems, DBMS, Computer Networks

**Frameworks/Tools:** Flutter, Git, GitHub, Kubernetes, REST APIs, Figma

**Areas:** Mobile Development, IoT Integration, Open Source Contribution, UI/UX Design
